

TABLE 3. Detailed Statistics for Industries, by Geographic Area and Selected
Types of Operation: 1963-continued

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.
(Z) Less than one-half of the unit of measure specified.

All in the Lead Ores Subindustry.

Includes ore valued chiefly for copper produced in other industries, amounting to less than 0.01 percent of the United States total.

In addition, receipts of \$935 thousand for custom or toll work for others on ores or residues were reported, of which about one-half was in the Lead and Zinc Ores Industries and about one-half in the Lode Gold Industry.

Includes figures for separately reported central and related facilities which were distributed by geographic area but not by type of operation.

Undistributed fuels costs for the Copper Ores Industry were \$34 thousand; for the Lead and Zinc Ores Industry, \$52 thousand; and for the Gold and Silver Ores Industries, \$125 thousand.

All in the Zinc Ores Subindustry.
